Filiberto Selvi

«Filiberto lives in his own magical world and when he wishes, he lets us enter to dream with him!» - Arturo Brachetti

Filiberto Selvi, a young talent in the world of illusionism, blends illusion, music, and theater into a cohesive experience that envelops and enchants the audience, intertwining music with magic.

At just 17 years old, he became Italian Champion of Magic, later winning the Swiss Championship and the Grand Prix Victor Balli. He has performed across the globe on significant stages such as the Magic Circle in London or on a European tour for the "World Magic Festival".

With his violin act, Filiberto tells the story of a street artist, who lives off his art and realizes at the end of his day that the value of music, through the emotions it evokes, is worth much more than any material wealth. A blend of magical and mysterious emotions that, between music and visual effects, offers a unique finale worth experiencing.

His ability to connect with the audience on a profound level turns each performance into an unforgettable journey through the realms of imagination and wonder.
