Mortenn Christiansen_

Mortenn Christiansen, FISM World Champion in Comedy Magic in Quebec in 2022 and in Parlour Magic in Turin in 2025, has followed a unique path in magic, having grown up without magician role models to inspire him to push his own limits.

At the age of twelve, Mortenn discovered a local magic shop that would become his favorite place, eventually hiring him due to his dedication. He even learned English there, essential for understanding magic instructions, thus initiating his path in local competitions despite his initial lack of interest in performance.

Mortenn's innovative approach to magic has captivated audiences worldwide, earning him a well-deserved reputation as a trailblazer in the industry. He challenges the paradigm of the necessity for every magician to perform, highlighting the strange pressure on those who simply want to learn the art of magic.

He encourages everyone to study and practice magic for themselves, emphasizing originality and perseverance as keys to success. Mortenn appreciates the adaptability of the magic community. He urges to aim higher, to create in an original way, and to always think about impressing intelligently rather than simply deceiving.
